Our Offer

Our comprehensive range has been developed to enable customers to source all of their panel product requirements from one supplier. From raw boards, MFC, MDF, CDF, matching edging tape and more, we have access to a huge variety of materials from the industry's leading manufacturers to ensure that we can fulfil any request.
With a vast choice of sheet sizes and thicknesses, cutting edge textures and in line registration, we are continuously investing in product development and innovation to provide our customers with the latest products and broadest portfolio possible.
We are proud to offer our first formaldehyde-free particleboard with SWISSKRONO BE.YOND and with SWISSKRONO BE.SAFE, the world's first antimicrobial wood-based panel surface.

Our product offer is supported with dedicated Panel Specialist branches who can be contacted on 0845 023 0376.

Size 2800 × 2070 mm
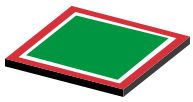
Thickness 8, 16, 18, 19, 25 mm

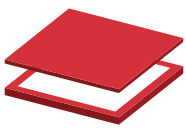


MATCHING LAMINATES AND EDGINGS

High Pressure Laminate (HPL)

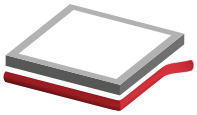
Size 2600 × 1300 mm
excl. Synchronised:
2750 × 1300 mm
Thickness 0.8 mm

Jumbo sheets postforming Grade and other thickness and specifications on request.

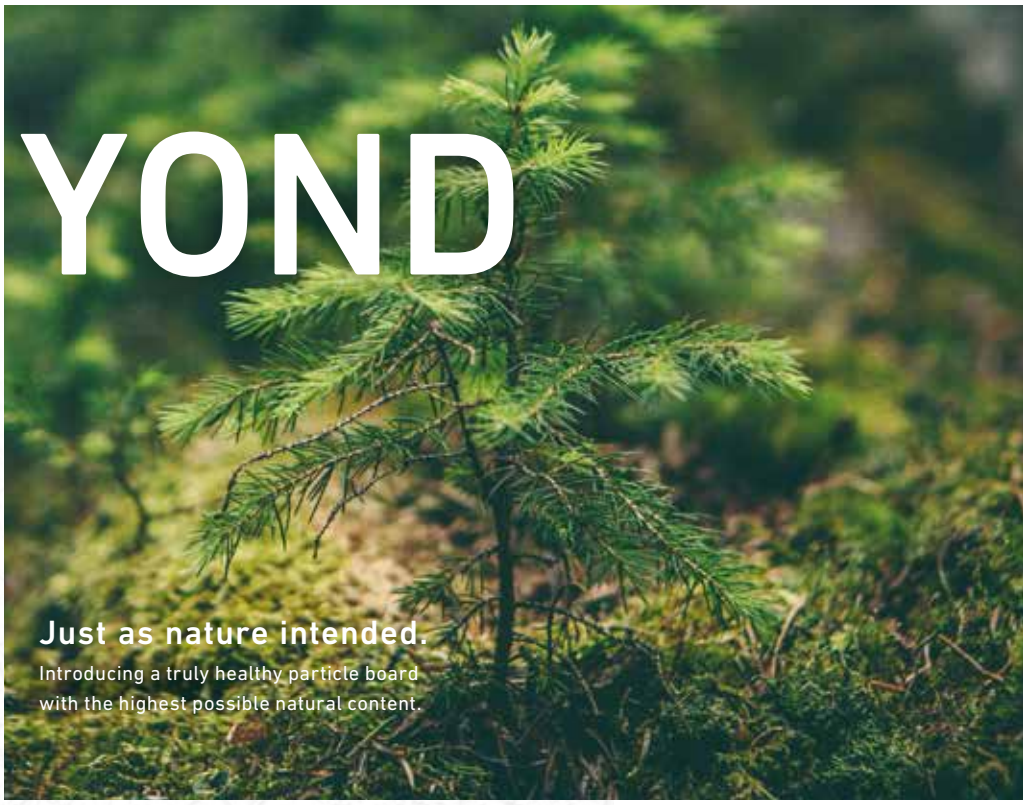


ABS Edging

(100 m Rolls)
Size 1 × 23 mm × 100 m
Thickness 1 mm



BE.YOND



PARTICLE BOARD

Just as nature intended.

Introducing a truly healthy particle board with the highest possible natural content.

BE.YOND PARTICLE BOARD

Our newly launched **BE.YOND products** are the most **environmentally friendly** particle boards available and are produced using **next generation bio-based** adhesives that provide the highest indoor air quality.

BE.YOND does not compromise on quality, but more importantly not on health: a genuine benefit for people and nature.

- *Minimum 98 % natural materials*
- *Same levels of emissions as a tree*
- *FSC®- or PEFC-certified on request*
- *Exceeds CARB Phase II standards*
- *Improves your LEED point of level*

BE.YOND is available in our full and extensive range of decorative designs & textures on demand. **swisskrono.com/oneworld**

Our healthy particle board is available in thicknesses of **8/16/18/19/25 mm** and sizes **2800x2070 mm** and **5600x2070 mm**.

SWISS KRONO GROUP

The tradition of the SWISS KRONO GROUP goes back to 1966 when the Austrian entrepreneur Ernst Kaindl founded the company in Menznau, Switzerland. Since then SWISS KRONO® has gone from strength to strength, we put our success down to our commitment to innovation and global expansion.

The owner's and employees' strong determination have given the company a top position in the wood-based material sector. The dynamic growth of SWISS KRONO GROUP allows for the development of new markets. Today the company's products are known in over 90 countries.

The combination of thoughtful investments and an experienced and ambitious team of employees guarantee the successful realisation of new ideas and dynamic growth in the future. The company employs 4,500 people, whose engagement and professionalism create products and services of the highest quality.

ENVIRONMENT

SWISS KRONO® products will impress you not only with their design and superior quality, but also with their excellent credentials. Our careful product planning, use of renewable energy sources and repeated use of wooden raw material, actively contribute to reducing CO_2.

Sustainable procurement of raw materials
The wood for our high-quality products comes exclusively from sustainably managed forests. Whenever possible we look for the relevant FSC® and PEFC™ sustainability certificates. "Swissness" is taken very seriously, as over 80% of our timber requirement comes from Switzerland.

Leader in ecological manufacturing
Throughout our entire supply chain we put the emphasis on energy-efficient manufacturing which makes the best use of resources. We are proud to take a leading role on an international level: By using over 90% renewable thermal energy, SWISS KRONO® products produce substantially less CO_2 emissions than comparable wood based products from within the EU. By buying our products you are making your personal contribution to environmental protection.

HOW PURE IS YOUR WOOD?

According to FSC® almost half of the people in the UK recognise the FSC® trademark logo design, and this increased awareness is contributing to the growth in the market of responsibly sourced timber and timber products.

SWISS KRONO® is a pioneer in sustainability and environmental protection. Setting it apart from other brands, the company is unique in producing the core board for its SWISS KRONO® One World Collection from virgin wood material.

The virgin wood is sourced from no further than a 350 km radius of the Swiss factory and meets and exceeds standard requirements from both FSC® and PEFC™. Bark and other surplus materials are totally recycled in the factory by burning them in a biomass unit to create electricity for the site. This leaves the wood free from any contaminates that may damage or shorten the life of machine tools, giving furniture manufacturers the benefit of exceptionally good machinability.

In the UK, the company has a 35 year distribution partnership with International Decorative Surfaces (IDS) who, with their 18 branches nationwide, provide extensive stockholding and rapid product availability to meet the demands of furniture manufacturers.

IDS hold 128 décors ex-stock which can be delivered to a customer's door in just 24–48 hours. Available exclusively from all IDS depots with no minimum order quantity. HPL and ABS edging matching the entire range is also available upon request.
