Splashbacks

Uniquely designed with safety in mind

Uniquely designed with safety in mind.

Bring your dream kitchen design to life with a beautifully patterned splashback that fills the entire wall space behind your hob, without compromising safety.

With Alloy, say goodbye to tiles and hello to a high performance, statement splashback you can place wherever you want.

Your Alloy splashback is fire-safe behind any hob and waterproof behind any sink; with simple sizing and no need for an expensive glass cover or to break up your design with a stainless steel hob panel.

Just cut, fit and cook.

Design that fits your space.

What are Alloy splashbacks?

Alloy splashbacks are patterned aluminium splashbacks, crafted to give you complete design freedom all around the kitchen - even in the Hot Zone behind the hob.

Beautiful Designs

Choose from 12 versatile tile & pattern designs, curated to bring your kitchen vision to life. Inspired by traditional tiles, geometric patterns and natural materials, every design works with multiple kitchen trends to build your dream kitchen.

Alloy can handle the heat.

Unlike other splashbacks, Alloy Splashbacks are steam, heat and fire resistant, making every design safe for the kitchen hot zone without compromising safety.

What's the Hot Zone?

The Hot Zone is the area around your gas or electric hob where the heat is most intense: directly to the front, side and rear that should be free of any flammable materials including plastic, wood, wallpaper and electrical plugs.

The concentrated heat in this area is the reason you need to use a non-flammable material splashback against the wall or you need to purchase a glass cover or break up your designs with a stainless steel hob panel to protect the Hot Zone.

Your Alloy Splashback is made from non flammable aluminium and can be placed directly behind any hob and sink. The 750mm height of the Hight Rise splashback and Hob panels allows you to fill the wall right up to hood height with design whilst being safe in the knowledge they are certified to be there.

Design without compromise.

Alloy Benefits

Beautiful Unique Designs

Choose from 12 versatile tile & pattern designs, crafted to bring your kitchen vision to life. Inspired by traditional tiles, geometric patterns and natural materials, every design works with multiple kitchen trends to build your dream kitchen.

Hot Zone Safe

Alloy splashbacks are steam, heat and fire resistant making them certified to be placed in the Hot Zone. allowing you to fill the full wall behind your hob right up to Hood height without breaking your design with Glass or stainless steel panels behind the hob.

Quick & Easy Installation

Installing an Alloy splashback is easy and mess-free. Alloy splashbacks can be cut to size with basic tools and attached to the wall with adhesive. For an Easy Installation overview, please refer to page 28.

Lifetime Warranty

Alloy splashbacks are guaranteed for their lifetime. We will make good by repair and/or replacement any Alloy Splashback which can be shown to have failed by reason of defects in its manufacture, subject to fair wear and tear. Refer to our warranty details on page 30.

Hardwearing & Scratch Resistant

Other splashbacks are damaged by steam and scratched by cleaning but Alloy Splashbacks are tough and hardwearing. You can place your Alloy splashback behind any hob or sink without compromising its look, feel or material integrity.

Easy to Clean

Unlike tiles there is no messy and mouldy grout to clean, Alloy is really easy to clean. Simply wipe down with a moist cloth and a mild detergent. Job Done.

Alloy Pattern

Alloy Patterns allow you to create a unique design statement in your kitchen; from marble to woods and geometric effects.

A beautiful combination of classic wood and contemporary geometry, Walnut Geometric is an abstract linear pattern in black, laid over a warm timber backdrop. The result is a statement alternative to a tile splashback with fascinating depth; a beautiful nod to mid-century influences.

Team it with jewel tone cabinets to complete a warm palette, or let Walnut Geometric do all the talking in an otherwise minimalist space.

White Marble Splashback Omega Brasilia Worktop

Geometry Splashback with Omega Venetian Marble Worktop

Make a statement with Alloy. Our Geometry design features white diamond tiles in a geometric pattern with black grout lines, and no mess. The realistic White Marble splashback by Alloy is a beautiful alternative to tiles or real marble, and a luxurious statement to complete any kitchen; with a white backdrop and striking grey veins that sprawl its length.

Urban Cluster Splashback with **Omega Block Board Oak** Worktop

Stellate Blush Splashback with **Options Gardenia** Worktop

Alloy splashbacks are finished with a smooth matt surface but decorated with patterns using realistic textures. Urban Cluster shows painterly flowers over a worn cement backdrop, while Stellate Blush features a debossed effect, creating detail that adds depth even from across the room.

Alloy Tile

With Alloy, you can enjoy classic tile effects without the grout. Alloy tile splashbacks, including White Crackle Tile, are designed to look like real tiles, but go straight onto the wall in one piece, cutting out the long and expensive tile installation process and leaving no grout to scrub.

Alloy tile designs can be simply wiped clean with mild detergent.

Herringbone Cement Splashback with Omega Turin Marble Worktop

Maltese Ochre Splashback with Omega Brasilia Worktop

Designed to look like a classic herringbone tile pattern in long, thin, grey cement tiles, Herringbone Cement is the ideal addition to create a rustic or industrial finish.

Alloy in Maltese Ochre is designed to look like mosaic tiles in grey, white and yellow with a nod to Victoriana, offering all the beauty of vintage tiles with all the modern benefits of Alloy.

Alloy in Dappled Crackle Tile is designed to look like real grey glazed tiles laid in a classic subway pattern, known for creating the illusion of space and height in even the smallest kitchen.

Herringbone Whitewash looks like reclaimed wood in a chevron pattern, with realistic knots and grains.

Modern Victoria Splashback with **Omega Paros Marble** Worktop

With an eclectic mix of classic patterns in shades of grey, Modern Victoria captures the effect of encaustic tiles with fast and easy installation.

Influenced by vintage style Moroccan ceramic tiles, Casablanca Multi captures a muted kaleidoscope of trellis style tiles with the added Alloy benefits of scratch and heat resistance. A beautiful statement ideal for splashing pattern into a classic kitchen design, or the cherry on top of an eclectic vintage style.

Alloy Sizes

You need uncompromising design, so why compromise?

Alloy Splashbacks come in four sizes, but you're not limited by the size of the panel you buy - it's easy to cut your panels to the size and shape you need.

High Rise Splashback – The 750mm height of the high rise splashback allows you to fill the wall right up to hood height with design whilst being safe in the knowledge they are certified to be there. You don't need to interrupt the design with a different panel type to protect your home

Mid Rise Splashback – The Mid Rise splashback's 600mm height is ideal for use behind a sink, or filling the space behind a hob between worktop and upper cabinets.

For a focused area of design a hob panel is the perfect solution. Choose between two different sizes both with an 800mm height.

Alloy Easy and fast Installation

Just cut, fit and cook.

Alloy splashbacks are quick and easy to install, with no professional fitting required. To view our installation video or download our installation instructions visit

www.bushboard.co.uk/alloy

Installation.

Alloy splashbacks can be jointed with simple Butt Joints or by using our beautiful aluminium trims available in both Matt Silver and Anthracite.

Trims are available to neatly fit either an internal or external corner, and edge trims create a sleek finish.

Keep it Clean.

Alloy splashbacks are high performance with low maintenance. We recommend keeping yours in top condition with the following steps:

Remove splashes, oil and grime by wiping clean with your preferred gentle household cleaner

Use a soft, non-abrasive cloth. We recommend a microfibre cloth or sponge

Alloy Complete Adhesive and Sealant

Complete Adhesive and Sealant

We know the importance of the final installation, that's why we've developed Complete, our bespoke adhesive and sealant which should be used when installing your Alloy Splashbacks.

Complete is available as an adhesive used to adhere your splashback to the wall and a colour matched sealant used to complete your installation around any joins or edges.

Our unique installation adhesive is technically superior and should be used to bond the panels to the wall. As this is not seen it is a cost effective neutral colour.

Complete sealant is available in a range of colour options, either chose from our recommendation for your splashback or match to your worktop. It's flexible, super strong and will not shrink or break down like silicone.

Alloy Lifetime Warranty

Our Testing.

Alloy splashbacks are beautiful, but they're also tough, performing exceptionally well during European Standards testing. Due to the nature of the aluminium material, they are 100% post consumer recyclable. For technical data please visit:

www.bushboard.co.uk/alloy

Lifetime Warranty.

Alloy Splashbacks are guaranteed for their lifetime. Bushboard will make good by repair and/or replacement (at its discretion) any Alloy Splashback of its manufacture which can be shown to have failed by reason of defects in its manufacture, subject to fair wear and tear, provided the product has been installed and used in accordance with the manufacturer's instructions and that the products are used for their intended purpose.

Proof of date and place of purchase required. This guarantee is in addition to your statutory rights as a consumer and does not affect your rights in any way.
