PROTECTING OUR PLANET

Our composite decking boards are made from recycled plastic and wood fibre, with no need for chemical based treatments like oiling, staining or painting, they really do help protect our planet.

The mark of responsible forestry

The wood fibres that are used to manufacture the decking boards, joists, corner edging strips, fascia boards and starter boards are all 100% FSC® certified, guaranteeing that the timber used is harvested from responsibly managed forests. By purchasing a product with such certification, you are supporting sustainable forest management worldwide.

ECO-FRIENDLY DECKING

Our composite boards look like wood, however they offer greater ecological sustainability and longevity when compared to standard timber boards.

MADE FROM SUSTAINABLE MATERIALS

Each 3.6m board contains 3kg of recycled plastic & 6kg of FSC® certified wood fibre.

RECYCLING PLASTIC BOTTLES

Every 1kg of recycled plastic is equal to 25 1L bottles. Each 3.6m board contains 75 recycled plastic bottles.

REDUCES DEFORESTATION

Our composite decking boards use less timber thus decreasing the need to cut down trees.

AVOIDING THE USE OF LANDFILL

Reusing materials like plastic bottles reduces waste going into landfill.

RECYCLABLE BOARDS

All Allur products can be recycled at local recycling centres.

HELPS REDUCE EMISSIONS

By using sustainable materials our boards help reduce carbon-dioxide emissions.

WHY CHOOSE COMPOSITE?

Our composite decking boards provide a long lasting performance that timber can't match. Produced using sustainable materials our boards are resistant to moisture, mildew and warping, and are available in a wide range of pretreated colour options to suit your style.

For further technical information, including installation instructions, product data sheets, and guarantee documents please refer to

WWW.ALLUR.CO.UK

The website is also full of other useful information including where to buy, a decking board calculator, a visualiser that displays your chosen décor in both a day and night setting, as well as a free sample service.

Please note that decking boards may experience a level of weathering caused by UV rays, which may result in a slight lightening of the colour 3 to 6 months after installation. You may also notice a slight colour difference between Allur decking boards and accessories. Note that once the weathering process has taken place; this colour lightening and difference will diminish.
